

CORRBOT

Creates Corrugated Carton Layouts

An Adobe Illustrator Plug-in
Worker72a.com

Installation

Copy the CorrBot.aip plug-in file into your Illustrator application's Plug-ins folder and launch Illustrator. The CorrBot menu command to open the floating plug-in pane will appear under the Window menu.

Usage

- Select measurement units (Inches, CM or MM)
- Enter panel, flap and glue tab dimensions
- Select Glue Tab position (Left, Right or None), Lead Edge (Top, Bottom or N/A) and Guide types (Copy Safe, Panel Center, Both or None) by clicking the associated buttons.
- Enable dimensions if desired.
- Click the Make Box button.

The resulting layout will be grouped for easy editing. Select the Dimension Text group to edit font, type size and color of the text. Select the Dimension Lines group to edit stroke weight and color of the dimension lines.

Plate & Plot

If you use plate center lines for mounting, the Plate & Plot function will add center marks with lead edge arrows to each selected plate group in your layout. Make each plate a group, select them and click "Plate & Plot."
